Job Description:

The goal of this position is to participate in ongoing research in the development of flavors and fragrances that provide IFF with new opportunities for profitable growth. In this role, the successful candidate will be responsible for managing sensory projects to support and guide the creative and technical teams, including development and implementation of current and new sensory science methodologies, execution of appropriate research, reporting results and providing technical recommendations.

This position will require development of an in-depth understanding of IFF flavor and fragrance business and how to best leverage sensory and statistical techniques to guide research.

Key Responsibilities:

- Design sensory/psychophysical experiments, analyze data, complete appropriate documentation of work, including technical reports & presentations
- Act as a functional representative on project teams
- Manage panelist pool & execute testing
- Document protocols
- Manage a direct report

Required Skills:

- PhD degree in the Behavioral Sciences (e.g., experimental psychology, psychophysics) or Sensory Evaluation
- Proven successful record of research in related field
- Proficient in standard (e.g., MS Office) and statistical (e.g., JMP) software packages
- Demonstrated ability to coordinate projects of larger size and technical complexity
- Functions independently within a broadly defined area
- Flexible in a fast-paced environment. Strong communication skills

Preferred:

- Experience in the area of fragrance or flavor research
- Demonstrated ability to lead cross-functional projects of moderate size and scope
- Works effectively on multiple projects simultaneously with minimal input from supervisor
- Demonstrated ability to supervise lower level technical professionals

Job Location:

- International Flavors & Fragrances Inc.
  R&D, Sensory Science & Consumer Testing Center
  1515 Highway 36
Position Type:

- Full Time

*All candidates must be currently eligible to work in the United States*
